🍓 THE FRUIT CAPACITOR

🍌 Examine Fruit

Enter your question:

I have an strawberry that's brown, with some white stuff it. Is i

Generate Answer

💬 Answer

Based on the context provided, it seems like the strawberry you described—brown with some white stuff inside—could be a sign of spoilage or overripeness. The context mentions "Visible deformities" and "None visible" defects, but it does not specifically address a strawberry that is brown with white substance inside.

Given this description, it is likely that the strawberry is no longer in a good edible condition. Brown spots and white mold can indicate spoilage, which can make the fruit inedible and potentially unsafe to eat. It's always best to discard any fruit that shows signs of mold or significant spoilage.

If you're unsure, it's better to err on the side of caution and not consume the

strawberry. If you have any doubts about the safety of any food, it's best to throw it away.
